

ABDULLAH MOHAMED SABER

Full Stack .NET Developer | ASP.NET Core, React & SQL Server

Giza, Egypt | +20 1021752765 | A.mohammed2256@nu.edu.eg | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack .NET Developer who builds production-grade web applications, AI-powered systems, and immersive VR platforms end to end. Architected the 3D pipeline for NUVerse, a VR Digital Twin platform that won 1st Place among 80 graduation projects (highest evaluation score) and received official technical acceptance from ITIDA, Egypt's national IT development agency. Core stack: ASP.NET Core, C#, Entity Framework Core, React.js, and SQL Server, developed through internships at DEPI, ITI, and NAID.

TECHNICAL SKILLS

- Languages: C#, Python, JavaScript, SQL
- Backend: ASP.NET Core, ASP.NET MVC, Entity Framework Core, FastAPI, Django, RESTful APIs, Web API
- Frontend: React.js, Three.js, Bootstrap, GSAP, HTML5, CSS3, Responsive Design
- AI & Computer Vision: PyTorch, YOLOv8, Hugging Face, OCR, Computer Vision
- 3D & Immersive Systems: Unity, Blender, VR Development, Digital Twin Systems
- Tools & Practices: Git, GitHub, Azure, Agile, Scrum, SOLID Principles, CI/CD, Clean Architecture

WORK EXPERIENCE

Full Stack .NET Intern

Nov 2025 - Jul 2026

Digital Egypt Pioneers Initiative (DEPI) — Cairo, Egypt

- Engineered and maintained ASP.NET Core applications and RESTful backend systems, designing Web API endpoints that streamlined frontend-backend integration.
- Led a team as Team Lead on Medixa-AI, a Smart Medical Laboratory Management System, from architecture through delivery.
- Optimized SQL Server queries and Entity Framework Core data models, improving performance across core data operations.
- Participated in Agile/Scrum sprint cycles, code reviews, and iterative releases as part of a cross-functional engineering team.

Computer Vision Software Engineering Intern

Jul 2025 - Sep 2025

National Academy of IT for Persons with Disabilities (NAID) — Egypt

- Co-developed Smart Bridge, an assistive technology prototype enabling real-time communication for deaf-blind users, presented at a closing ceremony attended by Egypt's Minister of Communications and IT.
- Implemented OCR and YOLOv8-based sign recognition pipelines for the Egyptian dialect.
- Collaborated directly with accessibility specialists to validate real-world usability requirements.

.NET Development Trainee

Aug 2025 - Sep 2025

Information Technology Institute (ITI) — Remote

- Completed 120 hours of intensive training, building backend projects with C#, SQL Server, Entity Framework Core, and ASP.NET MVC.
- Applied SOLID principles and layered software architecture across full-stack training projects.

Freelance Full Stack Developer

Jan 2025 - Present

Self-Employed — Remote

- Delivered 3+ client-facing full-stack and React.js projects for startup-oriented use cases with 100% on-time delivery, owning the full lifecycle from requirements through QA.

PROJECTS

NUVerse — University VR Digital Twin Platform | Unity, Blender, React.js, Web APIs

- Architected the 3D asset pipeline for a VR/Web digital twin of Nile University, reducing load times by approximately 40%.
- Integrated RESTful APIs for real-time campus synchronization across VR and web clients.
- Result: 1st Place among 80 graduation projects (highest overall evaluation score); technically accepted into ITIDA's ITAC funding program.

Medixa-AI — Smart Medical Laboratory Management System | ASP.NET Core, React (Vite), Entity Framework Core, SQL Server

- Led the project as Team Lead (DEPI capstone), architecting a full-stack laboratory management system using Clean Architecture principles across sample tracking, test workflows, and results management.
- Designed the data layer with Entity Framework Core and SQL Server to support scalable, multi-role access (lab staff, technicians, administrators).

Arabic NLP Hackathon — Aspect-Based Sentiment Analysis | MARBERT (Transformer), Python

- Built a transformer-based Arabic sentiment analysis system classifying 8 aspect categories, achieving ~0.89 Micro F1.
- Advanced to the Top 30 of 200+ competing teams.

STEMMY — AI-Powered Tutoring Platform | React.js, FastAPI, PyTorch, YOLOv8

- Built an AI-powered STEM tutoring platform with real-time emotion analysis, integrating a FastAPI backend with YOLOv8 computer vision models.

EDUCATION

Bachelor of Science in Computer Science

Oct 2022 - Jul 2026

Nile University — Giza, Egypt | GPA: 3.57 / 4.0

- Continuous Partial Scholarship Recipient — ITCS School (2022–Present).
- 2nd Place — UGRF Forum, for an image encryption and AI tutoring research project.
- Top 30 of 200+ teams — NASA Space Apps Challenge (2025).

LEADERSHIP & LANGUAGES

- IEEE NU Student Branch Member; DeepX & Digitopia Competitions Participant. | Languages: Arabic (Native), English (Fluent), German (A1).
